The Sohmer Piano

is a wonderful instrument, and has taken the lead throughout the musical world. The principal qualities, which have so excited the admiration of musical people are the strength, richness and fullness of tone, possessing a light action, delightfully flexible to the touch, suitable for either the concert room or parlor. With these combined qualities, it has become the most popular instrument in the world.

A fine assortment of these splendid pianos always in stock at Jenkins Piano Co. and look them over.

CIGARET PROBABLY CAUSED DEATH OF MEXICAN; SET HIS BED ON FIRE

A lighted cigarette probably caused the death of Alberto Padilla, a Mexican 22 years of age, who was smothered to death in his room at 818 Broadway early Sunday morning.

When policemen broke into his room from which smoke was issuing at 2:30 Sunday morning, they found the mattress and bedclothing smoking and the man lying on the bed dead. He was hurried into the air but all efforts to resuscitate him proved unavailing. The bedding was also thrown into the street and no fire alarm was turned in.

It is believed that the man went to bed smoking a cigarette and fell asleep with it in his mouth, the fire from the end falling on the bedding and setting fire to it.

Coroner E. B. McClintock found that he had died from suffocation.

LOST: TWO EL PASO FAIR KIDS
Jim Rous and George Clements in the Wilds of Los Angeles.

LOST—Two El Paso fair kids. One wearing a vertical mustache and the other with an open face effect. Last heard of in Los Angeles. Reward if returned to the El Paso Fair Association, or to the El Paso Fair association.

It is now a known fact that George Clements and Jim Rous are lost in the wilds of Los Angeles. They have been in the city of angel flights for three days now and not a single post card has been received from them. Friends expect the worst and are organizing a Dr. Cook party to go in search of the two lost fair kids in the big city. They left here last week, Rous on business and Clements to take the rest cure. The last heard of the two El Pasoans was the day after they arrived in Los Angeles. A returning visitor to Los Angeles said they were staying at the Hollenback hotel, where they had a suite of rooms with a bath between them. It is believed the traveler had work to do at a bath between them that they had a bath-room between them.

Rous is secretary of the El Paso fair and exposition while Clements is the director of Indian affairs for the big El Paso exposition. Both are "prominent city" of El Paso.

The rescuing party expects to leave tonight with a supply of gum drops and pemmican in search of the two intrepid travelers.

FIRES COST THE COUNTRY HEAVILY
(Continued From Page One.)

lation of less than 18,000,000 amounting to \$661,976,286, and the cost of building construction for the entire country is conservatively estimated at \$1,000,000,000. The report also shows that nearly one-half of the value of all the new buildings constructed within one year is destroyed by fire. The annual fire cost is greater than the value of the real property and improvements in either Maine, West Virginia, North Carolina, North Dakota, South Dakota, Alabama, Louisiana, or Montana. In addition to this waste of wealth and natural resources, 149 persons were killed and 1652 were injured in fires in the United States in 1907.

The Survey's Report.

The geological survey's inquiry, which is embodied in a report entitled "The Fire Tax and Waste of Structural Materials in the United States," prepared by H. M. Wilson and J. L. Cochrane, of the survey, covered not only the value of property destroyed but also the cost of maintaining fire departments, the amount of insurance premiums paid less the amount returned, the cost of protective agencies, the additional cost of water supplies, and other elements of the fire loss. The report gives the method of gathering the statistics collected, makes an analysis of the fire loss in city and country and on frame and brick buildings, and contains tables showing the increased cost of fire protection due to faulty construction.

The actual fire loss in the United States due to the destruction of buildings and their contents amounted to \$315,054,709 in 1907. This was \$2.51 less per capita. The per capita loss in the cities of the six leading European countries amounted to 23 cents. Comparisons of the total cost of fires, which includes the items already stated, show that if buildings in the United States were as nearly fire-proof as those in Europe the annual fire cost would be \$90,000,000 instead of \$456,000,000.

SAILOR KILLS A JAP.
Honolulu, H. I., Feb. 7.—While in an intoxicated condition, J. P. Hussey, a sailor of the Pacific cruiser fleet, which is in port here, shot a Japanese.

STRIKE QUESTION TO BE SETTLED WITH TODAY

American Employees on Mexican Roads May Walk Out Tomorrow.

Today it will be settled according to rumor from authentic sources. Representatives of American conductors and engineers will meet National railway officials at the City of Mexico, for the last time. "Strike or no strike," will be settled.

Opinion differs as to the ultimate outcome. It is said that the poll taken recently resulted in an almost complete voting of the strike sentiment, unless the demanded terms were granted, and Mexican officials say they will remain steadfast.

A new feature of the condition lies in the claim that many Mexican employees will follow the American railroad men in case of a walkout. It is declared that efficient Mexican trainmen, (native already acting as conductors of many freight trains), will strike with the Americans for the same simple reason that many of the foreigners are favoring a walkout—the absolute fear for their lives. The skilled Mexican trainman does not care to work with unskilled natives any more than the American, is the idea advanced.

In case of the strike many theories are being talked. One is that the National railways of Mexico will suffer heavily due to the delay in freight and passenger traffic which must follow the exodus of skilled American train and engine men. Also, it is hinted that it will be necessary, and in all probability will follow, that English engineers—who at least are efficient mechanics—will be imported to fill the vacancies.

But anyway, hope still lives that the matter will be settled without trouble today at the capital.

NEW EQUIPMENT FOR NORTHWESTERN
When It Arrives, Trains Will Enter Union Station.

Until new equipment arrives, the Mexican Northwestern trains will not enter the Union station. Local officials say that the new equipment will exceed in quality any leaving El Paso, but the amount of the order placed is not known here.

It is said that no obstacles lie in the way of El Paso departures. The Juarez station, recently established at Calle Comercio and the Juarez tracks, is considered adequate at present.

A new track of 35 kilometers running south from Terrenas will soon be completed. The work will be completed within a month, it is predicted.

Sometime ago the railroad officials completed arrangements for coming into the Union station.

BUTTONLESS CLOTHES THE LATEST THING
Family at the Union Station In Class With Horseless Carriage.

Button, button, who's got the button. Did you see 'em? Well you missed it. They were at the union station Saturday night—a man, his wife and three children and none of them wore buttons. Oh, no, nothing like that—they employed hooks and eyes to hold their somber clothes together.

They were merely members of a something-or-other religious sect, who do not believe in the button evil.

In their case, wife must hook up husband's clothes—sort of a come-back.

IN PRIVATE CARS.
The Edgemoor left the city yesterday on the way to Los Angeles with John Rockefeller's partner. The private car soon will have the honor of carrying Marie Cahill to this city.

Dr. L. D. Ricketts, of Cananea, was through here in a private car Saturday.

FREIGHT DERAILMENT.
Due to a small freight derailment near Wilcox, Southern Pacific passenger, No. 10, the Sunset limited, due at 6 p. m. did not arrive until after 10 o'clock today.

DON'T TRY PRESSURE
Trust to Intelligence.

You cannot by process of law prevent anyone from drugging themselves to death. We must meet the evil by an appeal to the intelligence.

One of the drugs that does the most harm to Americans, because of its widespread use and apparent innocence, is coffee.

Ask any regular coffee drinker if he or she is perfectly well. At least one-half are not.

Only those with extra vigor can keep well against the daily attack of caffeine (in the coffee.) The heart and pulse gradually lose strength; dyspepsia, kidney troubles and nervous diseases of some sort set in and the clearly marked effects of coffee poisoning are shown.

These are facts and worth anyone's thought. The reasonable and sensible thing is to leave it off and shift to Postum. The poison that has been secretly killing is thus withdrawn and a powerful rebuilding agent put to work.

The good effects generally begin to show inside of 10 days. If health and comfort are worth anything to you, try it.

"There's a Reason" For
POSTUM
Postum Cereal Company, Ltd., Battle Creek, Mich.

Boil
Postum
Full 15 minutes or longer after boiling commences
Then you not only get the fine color, fragrance (all its own), but the clear brain and steady nerves of "days of old."
